

Coilcraft has a full-line of Power over Ethernet Transformers available. Browse our products available for immediate shipping for samples or purchase.

Coilcraft PoE pre-designed products include signal path magnetics for common mode (CM) noise filtering and isolation, midspan magnetics, and transformers for powered devices.

Explore the SPoE Power Over Ethernet Transformer from Bel Fuse. View specs, download models, request a quote, and check stock. Reliable solutions designed for demanding applications. Order ...

Characteristics Flyback transformer designed for PoE PDs Input voltage: 36 V to 57 V Switching frequencies: 200-500 kHz Operating temperature: -40 °C to +125 °C Isolation voltage: 1.5 kVAC/1 ...

A PoE (Power over Ethernet) Transformer is a specialized transformer for Ethernet-based power delivery systems, which enables the transmission of both data and electrical power over a single ...

These transformers offer different output voltages, have an input voltage range of 9 V or 33 V to 57 V, and switching frequencies from 200 kHz to 400 kHz. The PoEH series feature an optimized core and ...

Coilcraft POExxPR PoE Transformers & Magnetics | Coilcraft available for sample or order, same-day shipment from Coilcraft.

NIC's POE (Power Over Ethernet) transformers are designed to support efficient power delivery and data transmission over Ethernet cables. These transformers are crucial for POE applications, ...
