

The Power System Relaying Committee (PSRC) is one of the 17 technical committees of the Power and Energy Society (PES) reporting to the PES Technical Council.

The purpose of the MRO Protective Relay Subgroup (PRS) is to identify, review and discuss system protection and control issues relevant to the reliability of the bulk power system and to develop and ...

Develop, recommend, establish, and maintain standards on protective relaying and control equipment and practices. Evaluate, report on, and develop standards on other pertinent aspects of protective ...

This guide identifies and summarizes the functions necessary for adequate protection of motors based on type, size, and application. This guide does not purport to detail the protective requirements of all ...

C52 - Revise standard C37.246 IEEE Guide for Protection System of Transmission-to-Generation Interconnections.

Understanding NERC Standard PRC-005-6: learn how EPE can help you avoid costly potential compliance pitfalls.

This guide identifies and summarizes the functions necessary for adequate protection of motors based on type, size, and application. This guide does not ...

PES Power System Relaying and Control (PSRC) Committee is responsible for the development of standards, guides and reports covering different aspects of protection and control of electric power ...

Evaluate and report on special protection schemes, remedial actions schemes, monitoring and control systems and their performance during abnormal power system conditions.

The PSRC was established over 75 years ago as the repository for the standards and application guides pertaining to protective relays used in our industry. Lots of changes have come to the industry since ...

Abstract: Protective relays and devices have been developed over 100 years ago to provide "last line" of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the ...
