

# Processing Method of Heat Shrink Joint Box

This document describes the procedure for applying heat shrinkable sleeves to field joints on a pipeline. It outlines responsibilities, material handling, surface preparation, application process including ...

Learn how to install Axis's heat shrinkable jointing kits for 11kV Tape Shield 3-core XLPE Insulated Cables. This guide provides step-by-step instructions to ensure secure, durable connections using ...

In this guide, we'll walk you through the necessary steps for preparing and jointing cable with JTS, but also give you some technical tips on the installation instructions.

The machine heats up quickly, and the thermal compensation effect is good; using advanced thermal infrared (wavelength 3-6um) radiation technology, the heat-absorbing efficiency of the heat ...

The processor is designed to process a broad range of heat-shrinkable products up to 19 mm [0.75 in] in diameter and 90 mm [3.5 in] in length. The infrared energy source is well-suited to efficient processing ...

This paper describes the automation of a heat shrink tubing prototype machine that benefits the wire harnessing industry.

A prototype of heat shrink tubing process is under development consisting of a custom-made radial heat chamber with two heat guns designed to move horizontally along a wire harness fitted into shrink ...

Heating tubes are installed on the top, bottom, left and right sides, which can heat at the same time. A high-speed centrifugal fan is also installed. When heating, the ...

JTSR1 heat-shrink repair joints are designed for unarmored, plastic insulated cables with Cu wire or Cu/Al tape screen, to be used to fix MV cables in which a di-electrical/mechanical damage occurred.

Figure 9.13 depicts the process of producing heat-shrinkable polyethylene tubing and the use of the tubing to cover a wire joint. In step I, the tubing is extruded and irradiated to obtain a gel fraction of 40%.

Typical methods and procedures employed to create safe S.W.A. cable joints on low voltage cables are described and demonstrated in the following programmes: LVJ-1 Resin Cast. LVJ-2 Heat Shrink. ...
