

Engineered for robustness, the trough cable tray boasts exceptional corrosion resistance and durability, confidently supporting the weight of numerous cables while maintaining unwavering stability and safety.

Manufactured by Shanghai Qiongkai Industry Co., Ltd., these trays are crafted from high-quality materials engineered to withstand extreme temperatures, ensuring robust protection for your ...

Crafted from materials like fiberglass, our molded cable trays boast extraordinary corrosion resistance. Perfectly suited for outdoor or challenging environments, they thrive where moisture and chemicals ...

These innovative trays are crafted from high-quality molded plastic or advanced composite materials, ensuring robust durability and efficiency. This cutting-edge pallet is specially engineered to offer ...

Constructed with resilience in mind, the trough cable tray boasts exceptional corrosion resistance and remarkable durability. It is engineered to endure the weight of multiple cables, maintaining its robust ...

There are galvanized, hot-dipped zinc, steel, stainless steel, aluminum, glass fiber reinforced plastic and other materials for customers to choose from, but also according to customer requirements to ...

The Powder coated cable tray, also called firespraying cable tray, is a cable tray product that has a layer of fire-resistant coating sprayed on the surface of a common cable tray, endowing it with fire-proof ...

There are galvanized, hot-dipped zinc, steel, stainless steel, aluminum, glass fiber reinforced plastic and other materials for customers to choose from, but also ...

Engineered with exceptional corrosion resistance and durability, this tray is built to endure the weight of numerous cables while maintaining its unyielding stability and safety.

Designed as a closed or vent structure for easy heat dissipation and moisture discharge, thereby reducing heat accumulation in the cable. Due to the lighter materials used, molded cable trays are ...

The surface of the fireproof channel cable tray has a frosted feeling. It is generally used in the distribution line of fire fighting equipment, such as fire control rooms, fire pumps, fire elevators, ...
