

Choose from a large range of products that provide reliable protection, cost savings and maximum availability for processes and equipment. No matter what the environment, ABB's high quality ...

Find your protection relay testing device easily amongst the 72 products from the leading brands (MEGGER, OMICRON, WUHV, ...) on DirectIndustry, the industry specialist for your professional ...

Megger's smart relay testing solutions and expert support help you validate protection performance, improve system reliability, and ensure continuity of power across your network.

A Measuring and Monitoring Relay is a protective control device. There are various types of Measuring and Monitoring Relays depending on what they monitor and output alarm signals for.

What is a Protection Relay? An electrical device designed to detect some specified condition in a power system, and then command a circuit breaker either to trip or to close in order to protect the integrity ...

We provide guidance regarding test signals, propose a number of ways to measure and compare relay performance, discuss the issue of type testing, and review requirements for transient simulation and ...

Tesmec TP-PMRG is a protection and measurement relay for the automation of remote controlled distribution substations, operated in medium voltage. Enables automatic fault location, isolation and ...

Measuring, protecting, controlling and maintaining electricity power networks in a smart grid world requires intelligent electronic devices (IED), such as smart energy meters, measuring relays, ...

Measuring and Monitoring Relays (alarm relays) protect your important devices and products against unlikely problems (e.g., overvoltage and overcurrent faults).

The measuring relays and monitoring relays report fault conditions and thus offer a high level of protection even for complex systems as well as ensuring an optimal production process.
