

Relay Protection of the Maintenance and Repair Department of the Maintenance Company

Relay systems protect high-voltage equipment and transmission lines to ensure safe, stable systems. Although failure of a protective relay system may have severe local or regional impacts, most ...

ABB has developed a preventive maintenance concept for the well-established SPACOM, RE500 and Relion series relays. These relays have been in the market for more than 20 years.

Protective relays monitor circuit conditions and initiate protective action when an undesired condition is detected. A strong test and maintenance program will keep protective relays in a high state of ...

The experienced relay technicians of Vertiv(TM) understand the critical nature of working with an active protection scheme and the impact testing and maintenance has on critical system operation.

Regular testing and maintenance of these relays help identify potential issues and ensure their proper functioning during fault conditions. In this informative text, we will explore the ...

When required to operate because of a faulted or undesirable condition, it is imperative that protective relays function correctly. A strong maintenance and test program will ensure protective relays ...

Our NETA certified technicians have the knowledge and experience to work on multiple types of technology from all major manufacturers, including electrochemical, solid-state, and microprocessor ...

This test determines whether protective relays, fault pressure relays, reclosing relays, reclosing supervisory relays, and associated control schemes are operating properly.

With over 20 experienced engineers and technicians in our protection and controls division, Premier Power Maintenance is fully capable of assisting utility customers with extensive infrastructure ...
