

The 350 continually monitors ambient temperature around the relay and alarms when the device is exposed to extreme temperatures and undesirable conditions such as air-conditioning unit or station ...

The comprehensive protection capabilities of SEL protection relays lay the foundation for a safer, more reliable distribution system.

The SEL-751 is the right solution for industrial and utility feeder protection, with conventional/low-energy analog (LEA) current and voltage input support, flexible I/O options, easy mounting, and fast settings. ...

The P14x series of feeder protection relays, part of the MiCOM P40 Agile family of protection relays, provide an integrated solution for the complete protection, control and monitoring of overhead lines ...

The SIPROTEC 7SX800 universal relay protects feeders, lines & motors in medium-voltage grids. This single, compact, cost-effective device offers powerful, proven protection for beginners and ...

Provides comprehensive protection, control, and measurement for medium-voltage feeders. Ensures reliable supervision of power distribution systems.

The Multilin(TM) 350 is a member of the Multilin 3 Series protective relay platform and has been designed for the protection, control and management of feeders or related applications as a primary or backup ...

Feeder protection relays are vital devices that protect power system feeders from various types of faults. They can improve power system reliability, security, and efficiency by quickly ...

The series includes protection relays for feeder protection, motor protection and general system voltage supervision. The plug-in design facilitates the commissioning of the switchgear and enables fast and ...

Feeder protection relays help protect power supply circuits for industrial and processing facilities. Relays made by Littelfuse provide integrated ground fault, overcurrent, overvoltage, undercurrent, ...
