

Standard Beamsplitters, which split incident light by a specified ratio that is independent of wavelength or polarization state, are ideal for illumination subassemblies or as one way mirrors.

Explore our collection of optical cable splitters and PON splitters for sale. Optical beam splitters are used to split the fiber optic light evenly into several parts at specific ratios. Buy optical splitters and passive ...

Keysight precision beam splitters are available in a wide selection of both cube and plate forms. Cube forms are available in both nonpolarizing and polarizing models.

Due to the multiple requests for a very accurate beam splitter we are finally offering a standard precision beam splitter - A visible band cube beam splitter with angles good to 1 arc minute and surfaces flat to ...

Tapered Optical Splitter - good directivity, good environmental stability, not sensitive to wavelength loss. Convenient, fast and practical, can be installed directly in a variety of fiber optical exchange box

Beamsplitters operate by splitting light based on reflection/transmission (R/T) ratios or specific properties like polarization or wavelength. Available in cube and plate configurations, these versatile ...

Custom beam splitters for lasers, photonics, and imaging. Plate, cube, polarizing, and dichroic tailored to your wavelength and specs.

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

Tapered Optical Splitter - good directivity, good environmental stability, not ...

LOW INSERTION LOSS AND BACK REFLECTION: The fiber splitter has low insertion loss and back reflection. **WIDE APPLICATION:** Widely used in home wiring, engineering projects, ...
