

Schematic diagram of the Singapore module of the suspended track

Firstly, the suspension module system model is established with parameter uncertainties and external disturbances. Additionally, the inner coupling of the suspension module is represented ...

The dynamic response of suspension footbridges to pedestrian-induced excitations and its passive mitigation, via multiple tuned mass dampers (TMDs), are investigated.

The schematic drawings are prepared using Microsoft Word and you can modify by transforming, merging, and coloring these drawings. You can freely use them for planning and drafting a report of ...

An engineering oriented decoupling control method for the module suspension system is proposed to solve the coupling issues of the two levitation units of the module in magnetic levitation...

In this 3D animation, we break down the entire mechanism - from the hanging track design to how the train moves safely above the ground. Perfect for anyone curious about futuristic ...

This document provides guidelines and criteria for the design of civil infrastructure for rail and road projects in Singapore. It covers topics such as alignment and ...

The electromagnetic propulsion was by attraction of iron in the train by direct current solenoids spaced along the track. The electromagnetic levitation was due to the repulsion between the train's ...

SINGAPORE: The multi-year programme to renew and upgrade the six core systems of the North-South and East-West MRT lines (NSEWL) was completed on Wednesday (Oct 25). The ...

To clearly understand the mechanism of the system, Fig. 4 depicts a schematic diagram of the suspended monorail TBI. In the actual operation conditions, the TBI is aggravated as the train speed ...

This document provides guidelines and criteria for the design of civil infrastructure for rail and road projects in Singapore. It covers topics such as alignment and structure gauge, loads, trackwork, ...
