

Self-powered current-type relay protection device

Eaton's protective relays provide you with unique microprocessor-based devices that eliminate unnecessary trips, isolate faults, protect motors and breakers, and provide system information to help ...

Simple but safe wiring, high electromagnetic interference immunity, uncomplicated adjustment and the ability to scale to different power quantities of the switchboard, helping the switchgear manufacturer ...

The C& S Electric CSDPR-V2-500 self-powered relay offers significant benefits in reliability and cost-effectiveness by eliminating the need for an external auxiliary power supply for core protection ...

All relays from the WI Line are self-powered time overcurrent relays, which means they take their energy from the current transformers without requiring auxiliary power, making them well-suited for use in ...

They are a type of protective relay that operates using power extracted from the system being monitored, eliminating the need for an external power source. This key characteristic makes ...

Our devices cover a wide range of applications and offer features such as slim design, embedded cybersecurity and IoT connectivity. Read frequently asked questions about our universal ...

Protect critical components in your power system with a wide range of SEL protective relays covering applications and use cases from low to high-voltage protection.

The relays are self powered by the operating current. No batteries, chargers or any other external power sources are required.

Find your self-powered protection relay easily amongst the 5 products from the leading brands (FANOX, SIEMENS, ...) on DirectIndustry, the industry specialist for your professional purchases.
