

Serbia-level Optical Transmission Network Project

Ciena announced that Telekom Srbija Group and its subsidiary Mtel are utilizing Ciena's coherent optical solutions to enhance network connectivity between Serbia and Bosnia-Herzegovina.

Ciena's 6500 Packet-Optical Platform equipped with WaveLogic 5 Extreme coherent transceivers will allow Telekom Srbija to deliver 800 Gb/s across a new 150-kilometer fiber route ...

As a member of the Telekom Serbia Group, Mtel operates within a strong regional ecosystem, providing advanced communications solutions across the Western Balkans.

Telekom Srbija Group and its subsidiary Mtel have launched a significant project to modernize the fiber optic network connecting Serbia and Bosnia and Herzegovina, using advanced ...

Telekom Srbija and Mtel Deploy Ciena Optical Technology to Improve Cross-Border Connectivity. Network upgrade drives 5G readiness and integration into European connectivity routes.

The high-capacity, low-latency network will provide scalable, highly resilient network performance and accommodate future capacity demands driven by hyperscaler traffic and the rollout ...

Telekom Srbija Group and its subsidiary Mtel deployed new optical transport infrastructure using Ciena technology to strengthen connectivity between Serbia and Bosnia ...

The high-capacity, low-latency network will provide scalable, highly resilient network performance and accommodate future capacity demands driven ...
