

Networks Supported - Our single mode fiber patch cable supports 10GBASE-L - 1310 nm, 10GBASE-E - 1550 nm & 1000BASE-LX - 1300 nm and more. Used where Fast Data Transfer is critical.

OS1 Fiber Patch Cable single mode is the standard and most common single-mode fiber cable used with wavelengths 1310 nm and 1550 nm with a maximum attenuation of 1 dB/km.

This high-quality single-mode fiber optic patch cable is specifically designed using SMF-28e fiber for ethernet applications. Each connection has great durability and is resistant to pulls, strains and ...

Single Mode 9/125 (OS2) fiber optic cables are used for single mode applications intended to run long distances due to the low rate of attenuation that results from the single projected light source.

This OS2 fiber patch cable is ideal for connecting 1G/10G/25G/40G/100G/400G Ethernet connections. It is best suited for long distance application and can transport data for up to 10km at 1310nm, or up to ...

The F-SMF-28-C-1FC Single Mode Fiber Patch Cord is 1 meter in length and has FC/UPC connectors at both ends. It uses Corning's F-SMF-28 single mode fiber for operation at 1310/1550 nm. This fiber ...

Fiber-Mart provides PM patch cords at six different wavelengths, including 780nm, 850nm, 980nm, 1060nm, 1310nm and 1550nm), with slow Axis or fast axis. Our PM patch cord ...

Quality Fiber Optic Patch Cord from factory, Simplex Single-mode Fiber Optic Patch Cord 1310nm / 1510nm With SC / LC Connector, 20 MOQ, Shenzhen, China, SC-LC

Ideal for indoor as well as outdoor applications, this fiber cable will reach distances of up to 10km (6.21371 miles) at 1310 (wavelengths). Scroll for more options. Single Mode OS2 fiber patch cords ...

Low Signal Attenuation: Offers low attenuation of 0.25 dB/km at 1550 nm and 0.35 dB/km at 1310 nm, supporting long-distance fiber communication. This LC to LC single mode fiber patch cable is ideal ...
