

If it goes out when you put the splitter on **BEFORE** you attach the other coax, then you don't have enough signal to split it and need to contact your ISP for an amp. If it goes out **AFTER** you plug in the ...

I was trying to not use a switch, I wanted both connections off the splitter to be connected at the same time. I can see now that's not possible unless I pull another wire from my router.

Sometimes the concern is that the cable is too long, that's not too bad. I'd like to take a look at things on my side with the TV box, and see if there is something that could be interfering with ...

Troubleshoot and prevent the Ethernet splitter from not working with our comprehensive guide. Keep your network running smoothly.

Learn how to fix an Ethernet cable splitter at home. Use this simple DIY guide to repair your internet connection and restore your signal fast.

Join us as we delve deeper into the world of Ethernet splitters, outlining various reasons and solutions when an Ethernet splitter not working, helping you restore an efficient and orderly ...

In this article, we've discussed how to troubleshoot an Ethernet splitter not working, including common causes, diagnosing the problem, troubleshooting tips, and more.

The only splitter I had was on the box at the side of the house, there are no other splitters in the house. I've tried replacing the splitter with several different new ones and none of them work.

I've just moved my BT router which means a couple of my LAN cables won't reach it. So I bought a two port RJ45 splitter adapter. So what I've done as I have...

In this guide, we'll walk you through the essential steps to resolve internet problems caused by splitter changes. **How to Fix Internet Not Working After Splitter Change**

Ethernet splitters are a handy tool for expanding a network connection in situations where you need to connect multiple devices to a single Ethernet cable. However, they aren't without ...

I'm working on a home set-up where I can split my network cable to use two computers on one side, and two ports on my modem on the other side (so a 2-1-2 config).
