A perfect half way marker between the Codfather and Over Easy, the Easy rider is a wave snatching machine for intermediate surfers desiring a strong wave count in busy lineups, and a cozy way to ...

Strength: Despite being lightweight, fiberglass is strong and durable, making it a suitable choice for motorcycle drag racing applications. It can withstand impact and resist corrosion.

Being glass ballons and resin (and a touch of x-55 for faster sealing), those corners come out stronger with less air and denting during handling (I'm a clutz in the shop, getting better, lol).
