

Swiss Solutions Edge Data Center Explosion-Proof

We design and manufacture a wide range of explosion proof (flameproof / ATEX) products including enclosures, control cabinets, junction boxes, switches, sensors, control stations, motor starters, ...

The data centers are resistant against any known civil, terroristic and military threat, incl. ABC and EMP. Embedded inside the Swiss Alps and hermetically sealed, the data centers also offers protection ...

We provide the necessary expertise for the combination of explosion protection and data transmission - this includes a comprehensive kit of components for the flexible assembly of solutions in a very short ...

In close partnership with you, our experienced experts in our Solution Engineering Centers (SEC) plan, develop and design engineered solutions for explosion-hazardous areas, including certification.

Data centres are critical infrastructure supporting business continuity, digital services, and essential communications. Their unique risk profile of high-value equipment, dense cabling, and reliance on ...

The unique operational challenges of edge data centers, including space constraints, variable workloads, and exposure to harsh environmental conditions, are driving demand for compact, ...

Here's why edge data center security can be challenging, and what data center operators can do to mitigate the risks.

Versatile, shock-resistant, and explosion-proof lighting with a slim design, the XLN17-EM Series can be mounted in various hazardous locations, ranging from mines to petrochemical facilities.

We work with you to develop the optimum solution for your Edge data center. While the demands on the core network are increasing, it is also essential to expand the edge infrastructure, in order to meet ...

Explore STI's firestop solutions for data centers, offering unique, maintenance-free pathways for high cable density ensuring compliance and protecting critical infrastructure.
