

Swiss manufacturer DML pluggable optical module

MACOM delivers industry widest portfolio of chip-sets for 800Gbps (8x106Gbps) optical modules. These devices are typically used with VCSEL lasers and Photodectors for optical transmission over multi ...

Featuring a single +12V DC power supply and a SMA RF input connector, this module is easy to operate and integrate. The module can be controlled remotely via the RS485 interface. Wavelength other ...

Featuring a single +12V DC power supply and a SMA RF input connector, this ...

Get the pluggable module performance you need from the manufacturer of choice for all major networking equipment vendors worldwide.

Discover the top 10 optical transceiver manufacturers advancing 400G and 800G modules powering hyperscale data centers and next-generation networking infrastructure.

The Arista XPO (eXtra-dense Pluggable Optics) module is a purpose-built solution designed from the ground up to address the unique challenges of hyperscale AI data centers.

These small, modular optical interface transceivers offer a convenient and cost-effective solution for an array of applications in the data center, campus, metropolitan-area access and ring ...

GIGALIGHT 100G QSFP28 LR4 optical modules are used for long-distance transmission in the datacom or telecom field and are compliant with IEEE 802.3ba 100GBASE-LR4 Ethernet transmission ...

Supporting the OpenZR+ Multi-Source Agreement (MSA), the new 400G OpenZR+ QSFP-DD Optical Module from Molex provides a high level of performance and scalability for next-gen data centers ...

Marvell offers a portfolio of DCI modules designed to efficiently transmit data over regional fiber networks.
