

Cable tray installed in a hazardous location must contain only those cables that are appropriate for this type of environment as defined in Chapter 5 of the NEC.

Uneven support points or excessive spacing of cable trays can cause deformation of the trays, and may even result in uneven stress on the cables, leading to wear and damage.

Some applications may require the cable tray to support the weight of a single, dead object in addition to the cable loads. Specifications typically require this to be applied at the midpoint of the span between ...

This comprehensive guide investigates the most frequent wire management challenges faced in real-world setups and demonstrates how the correct cable tray accessories may address them.
