

Our product portfolio includes fiber panels, advanced optical modules, passives, and a suite of accessories to meet your needs. Define your network architecture, choose the panel configuration, ...

Laser diodes (LDs) are the standard light-emitting components in most modern optical modules--including all Weunion SFP transceivers. Unlike LEDs, LDs produce coherent light with a ...

Flexi Multiradio 10 Base Station System Module FSMF is equipped with two integrated transport interfaces: electrical Gigabit Ethernet (GE) interface (EIF1) and optical interface (EIF2/RF/6). The ...

Flexi Multiradio 10 Base Station System Module FSMF is equipped with two integrated transport interfaces: electrical Gigabit Ethernet (GE) interface (EIF1) ...

DFA2F1FDD1M1010F0P Pushlok™; hardened connector technology is the key component enabling smaller terminals for FTTx networks than ever before. Designed for use in nearly every ...

As a leading solution in high-speed applications, QSFP-DD transceivers are often compared with other modules such as QSFP56, QSFP112, OSFP, and CFP2. So what are the ...

The SFP optical module is a standardized, modular assembly designed to be quickly installed or removed from a device's port without requiring the device to be powered down.

QSFP-DD800 modules enable higher radix for next-generation network designs and provide super-high-density connections over copper, single-mode, and multimode fiber. Ideal for web-scale data centers, ...

Adopting the FDD architecture, we model linear effects using physical laws and deploy the Optical Transformer for the computationally intensive nonlinear effects. This approach combines the ...

Explore the ultimate guide to optical modules. Learn types, functions, performance metrics & how to choose the right module for your fiber network.
