

## Will using a splitter result in two IP addresses

Am I correct that the easiest way to split them and run two different networks is to run their modem into a unmanaged dumb switch, and then from there into two different Firewalls, setup with each static IP ...

An Ethernet splitter divides one Ethernet connection into two without managing network traffic or providing more IP addresses. This is most useful when there are few network ports and low ...

While not inherently dangerous, using an Ethernet splitter can introduce network instability and signal degradation, potentially leading to connection problems.

Very technically you could use technology to add more ports BUT most ISP only give you a single IP address so only 1 device will function. This is reason people have a router, its primary...

To get around that problem, you can use an Ethernet splitter, or rather, an Ethernet switch. These devices can take a singular incoming Ethernet connection and make it accessible to ...

Also, Ethernet splitters are not appropriate for systems that need distinct network communication between devices since they do not manage network traffic or offer any extra IP ...

One of the most common solutions is to use a network switch or router, which can connect multiple devices to the network without compromising signal quality. You can also use ...

An Ethernet splitter divides one Ethernet connection into two without managing network traffic or providing more IP addresses. This is most useful ...

Splitters offer a quick solution for adding a second network connection without running a new cable, but they trade maximum speed for convenience. While affordable, splitters have ...

I've been trying to find information regarding how to use multiple static IP addresses at one time, but I'm still a bit confused after reading through other posts.

If you attempt to use this two turn one connection into two, I see two possible scenarios: Only one device will receive a connection, or, the port on the switch/router will fail to work properly ...
